

## 1 Purpose

The purpose with this procedure is to describe how the management defines and verify the quality policy of the Company.

## 2 Responsibility

The Managing Director is responsible that a quality policy has been established, made known and understood by all persons within the company.

## 3 Quality Policy

3.1 Our general quality policy is;

**“To provide Solid State Modulators that meets the customer’s requirements with efficiency & consistency”**

3.2 Our policy means;

- That we produce pulse generators for high power (Modulators) that are based on Solid State technology
- That our products shall comply with the customer requirements which includes;
  - Requirements on performance, size, weight, interface etc
  - Contractual requirements i.e. delivery time, quantities, warranty etc
  - Legal requirements and standards i.e. CE-marking, electrical safety, environment requirements, applicable laws and regulations etc
- That our products shall be produced in an efficient way, so that the company becomes competitive, profitable and our customer is satisfied with our lead times. The efficiency also means that we are continuously improving our QA-system, documented in the Management reviews.
- That our products shall be produced with such quality, so that when products are made in quantities all the products shall have the same (consistent) performance.
